## Beer Menu

## Beer Menu     Fine craft beers from Germany

Beer is a major part of German culture. For many years German beer was brewed in adherence to the *Reinheitsgebot* or purity law which only permitted water, hops and malt as beer ingredients until its repeal in 1988.

In total, there are approximately 1300 breweries in Germany producing over 5000 brands of beer. The Benedictine abbey *Weihenstephan* brewery (established in 725) is reputedly the oldest existing brewery in the world (brewing since 1040).
